

Mia Lahtinen

Software Developer

I am a Software Developer looking for new challenges and opportunities to grow. I would like to put my learned skills to use and to improve them through more experience while developing great products and services.

WORK EXPERIENCE

Software Developer

Ab Transfennica Oy
September 2019 – January 2020
Achievements

- **Developed an internal prototype application** using a low-code platform, Outsystems.
- Updated web page to **improve on existing features**.
- Worked with Azure and helped migrate from depreciated API Developer portal.

Software Developer

Ab Transfennica Oy
November 2017 – August 2019
Achievements

- **Developed features and fixed bugs** for the one of the company's admin interfaces
- Built the foundations for **a new dashboard admin** to replace the previous one with a new and more manageable technology.
- Took care of **assisting new customers** interested in using the company's REST API.
- **Improved User Experience** using customer feedback and implementing the priority changes.

EDUCATION

Business Information Technology

Haaga-Helia University of Applied Sciences, Helsinki
2020

International Baccalaureate Certification

Southville International School and Colleges, Philippines
2014

PROJECTS

Front-End Android Developer (Student Project) December 2017

Built a social media app focused on making friends. 17 people worked on the project in 6 smaller teams. It was built on top of a React Native starter kit called Pepperoni. I focused on the front-end, developing features. Along with another teammate, I had worked on developing the user interface of the main view and user profiles. This project was in collaboration with Futurice

Full-Stack Developer (Student Project) May 2017

Rebuilt a dynamic version of the client's current webpage with data from a database. The team members were given their own focus points, however we did help each other when we got stuck. I focused on both the backend and front-end along with two other team members.

TECHNICAL SKILLS

Technologies, Frameworks & Libraries

ReactJS, AngularJS, Node.js, REST, Spring, Git, Atlassian

Programming Languages

Javascript, Java, HTML/CSS, SQL

Other Skills

WooCommerce, Shopify, Wordpress, AWS, Adobe Photoshop, Scrum

LANGUAGES

English	Native
Finnish	Working
Filipino	Conversational
Korean	Basic

SOFT SKILLS

I am inquisitive and enthusiastic to learn, especially in the web development field. Objective and goal-driven. I can work both alone and in teams as I like to listen and take in opinions and suggestions, but I do voice out own opinions when needed. I eagerly look for something useful to do with my time.

INTERESTS

VISUAL ARTS

GAMING

ADDITIONAL PROJECTS

Graphic Designer May 2016

Designed and created a logo for a company named "First Hand". It was themed around the Northern Star with the colours white and blue.

Game Environment Artist July 2016

Designed and created environment pieces for a 2D Solarpunk themed isometric turnbased game demo. We worked in sprints during my part in the two-month project.
